

## Apps in Motion

In 2006, the Nintendo Wii revolutionized the gaming industry based on a simple idea, combine gaming with motion.

### Wokamon

The Wokamon app combines the function of a pedometer with the engagement of a virtual pet.

---

Ingress is an augmented reality game, that encourages local exploration and movement.

---

---

---

---

---

---

---

---

Instead of trying to radically alter the gaming habit that kids have developed, if we introduce them to games and apps that encourage activity while gaming, we can start to change the way they grow.
