

Prehomework:

What About Us? Older Adults and Libraries

1. If possible, find out what % of cardholders at your library are age 50 and older (birthdate of 1969 or earlier if you gather that information on your library card applications).
2. Think of one older adult who inspires you and *why* – could be someone living or dead, related to you or not (fictional is fine too).
3. Look around for one innovation related to older adults and come prepared to share a sentence or 2 about it (could be anything – a service, a technological innovation, a social innovation, a website, something you saw in a magazine - anything that you think is interesting and innovative.)

All the best,
The People of PCI Webinars
